# AVIGILON™

Avigilon Unity Access 7

Intuitive, future-proof and secure access control

Help keep your people, property and places safer with Avigilon Unity Access. This browser-based, on-premise access control solution empowers enterprise-class organizations to easily address a wide range of security challenges with intuitive operations and future-proof integrations to meet your current and future needs. Unlock the power of comprehensive, end-to-end security for your organization with Unity Access.

Feature spotlight

Interactive Scenes
Visualize your security environment with customizable views and dynamic icons. Gain instant situational awareness and insights to enable faster responses and smarter decisions.

Intuitive User Interface
Streamline your operations and make more informed decisions with an intuitive interface. Gain instant access to the information you need to respond to security incidents quickly and confidently.

Flexible Integrations
Create a tailored, future-proof security solution that meets your unique needs. Built with RESTful API and open-platform hardware support, you can seamlessly integrate with a wide range of third-party devices and solutions.

Mobile Friendly
Protect your facility anytime, anywhere. Manage your system from any browser or mobile device, swiftly perform daily operations with the mobile app and extend access control to remote locations with Unity Access Verify virtual stations.

Secure & Reliable
Unity Access' secure, custom Linux operating system minimizes the risk of virus attacks, eliminates operating system maintenance costs and keeps your data secured.

End-to-end Safety & Security
Experience a unified security solution. Integrate with Avigilon Unity's video and decision management systems and other Motorola Solutions technologies to enhance situational awareness and streamline operations for end-to-end safety and security.
